Texas Commission on Environmental Quality Filed: March 5, 2024

Combined Notice of Public Meeting and Notice of Application and Preliminary Decision for TPDES Permit for Industrial Wastewater New Permit No. WQ0005289000

**APPLICATION AND PRELIMINARY DECISION.** City of Corpus Christi, P.O. Box 9277, Corpus Christi, Texas 78469, which proposes to operate the Inner Harbor Desalination Plant, a seawater desalination facility, has applied to the Texas Commission on Environmental Quality (TCEQ) for a new permit, Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0005289000, to authorize the discharge of water treatment waste at a daily average flow not to exceed 34,300,000 gallons per day (gpd) for the initial phase and 51,500,000 gpd for the final phase via Outfall 001. The TCEQ received this application on January 22, 2020.

The facility will be located at the intersection of Nueces Bay Boulevard and East Broadway Street, in the City of Corpus Christi, Nueces County, Texas 78401. The treated effluent will be discharged from Outfall 001 directly to Corpus Christi Inner Harbor in Segment No. 2484 of the Bays and Estuaries. Outfall 001 is proposed to be located in the Inner Harbor Ship channel. The designated uses for Segment No. 2484 are non-contact recreation and intermediate aquatic life use. In accordance with Title 30 Texas Administrative Code Section 307.5 and TCEQ's Procedures to Implement the Texas Surface Water Quality Standards (June 2010), an antidegradation review of the receiving waters was performed. A Tier 1 antidegradation review has preliminarily determined that existing water quality uses will not be impaired by this permit action. Numerical and narrative criteria to protect existing uses will be maintained. A Tier 2 review has preliminarily determined that no significant degradation of water quality is expected in Corpus Christi Inner Harbor, which has been identified as having intermediate aquatic life use. Existing uses will be maintained and protected. The preliminary determination can be reexamined and may be modified if new information is received.

This link to an electronic map of the site or facility's general location is provided as a public courtesy and is not part of the application or notice. For the exact location, refer to the application. https://tceq.maps.ar-cgis.com/apps/webappviewer/index.html?id=db5bac44afbc468bb-ddd360f8168250f&marker=-97.418055%2C27.8075&level=12

The TCEQ Executive Director reviewed this action for consistency with the Texas Coastal Management Program (CMP) goals and policies in accordance with the regulations of the General Land Office and has determined that the action is consistent with the applicable CMP goals and policies.

The TCEQ Executive Director has completed the technical review of the application and prepared a draft permit. The draft permit, if approved, would establish the conditions under which the facility must operate. The Executive Director has made a preliminary decision that this permit, if issued, meets all statutory and regulatory requirements. The permit application, Executive Director's preliminary decision, and draft permit are available for viewing and copying online at https://www.cctexas.com/government/city-secretary/agendas/misc.

Notice of Opportunity to Comment on Shutdown/Default Orders of an Administrative Enforcement Action

The Texas Commission on Environmental Quality (TCEQ or commission) staff is providing an opportunity for written public comment on the listed Shutdown/Default Orders (S/DOs). Texas Water Code (TWC), §26.3475, authorizes the commission to order the shutdown of any underground storage tank (UST) system found to be noncompliant with release detection, spill and overfill prevention, and/or, after December 22, 1998, cathodic protection regulations of the commission, until such time as the owner/operator brings the UST system into compliance with those regulations. The commission proposes a Shutdown Order after the owner or operator of a UST facility fails to perform required corrective actions within 30 days after receiving notice of the release detection, spill, and overfill prevention, and/or after December 22, 1998, cathodic protection violations documented at the facility. The commission proposes a Default Order when the staff has sent an Executive Director's Preliminary Report and Petition (EDPRP) to an entity outlining the alleged violations, the proposed penalty, the proposed technical requirements necessary to bring the entity back into compliance, and the entity fails to request a hearing on the matter within 20 days of its receipt of the EDPRP or requests a hearing and fails to participate at the hearing. In accordance with TWC, §7.075, this notice of the proposed order and the opportunity to comment is published in the Texas Register no later than the 30th day before the date on which the public comment period closes, which in this case is April 15, 2024. The commission will consider any written comments received and the commission may withdraw or withhold approval of an S/DO if a comment discloses facts or considerations that indicate that consent to the proposed S/DO is inappropriate, improper, inadequate, or inconsistent with the requirements of the statutes and rules within the commission's jurisdiction, or the commission's orders and permits issued in accordance with the commission's regulatory authority. Additional notice of changes to a proposed S/DO is not required to be published if those changes are made in response to written comments.

Notice and Opportunity to Comment on Requests for Consistency Agreement/Concurrence Under the Texas Coastal Management Program

On January 10, 1997, the State of Texas received federal approval of the Coastal Management Program (CMP) (62 *Federal Register* pp. 1439 - 1440). Under federal law, federal agency activities and actions affecting the Texas coastal zone must be consistent with the CMP goals and policies identified in 31 TAC Chapter 26. Requests for federal consistency review were deemed administratively complete for the following project(s) during the period of February 12, 2024 to March 1, 2024. As required by federal law, the public is given an opportunity to comment on the consistency of proposed activities in the coastal zone undertaken or authorized by federal agencies. Pursuant to 31 TAC §§30.20(f), 30.30(h), and 30.40(e), the public comment period extends 30 days from the date published on the Texas General Land Office web site. The notice was published on the web site on Friday, March 8, 2024. The public comment period for this project will close at 5:00 p.m. on Sunday April 7, 2024.

Federal Agency Activities:

Applicant: United States Fish and Wildlife Service

**Location:** The project site is located in East Galveston Bay, along the southern shoreline of the Moody National Wildlife Refuge, in Chambers and Galveston Counties, Texas.

#### Latitude and Longitude:

Beginning: Latitude: 29.535528, -94.708919

End: Latitude: 29.544306, -94.659686

**Project Description:** The applicant proposes to discharge a total of 23,300 cubic yards of fill material in the form of graded riprap into 5.06 acres of shallow water habitat for the construction of a breakwater in 3 segments. The crest elevation proposed is 3.5-foot above the high tide line (HTL). The width of the breakwaters will be 3-foot with 2:1 side slope and a base of 21 feet. Fish passes measuring 30-foot-wide will be placed in 500-foot intervals. Navigation beacons will be placed at the beginning, end, and every 550 feet of each breakwater.

The applicant has stated that all work will be performed in water. There will be no equipment use or access/staging areas on land or in wetlands. There will be no impacts to wetland areas. Mitigation is not proposed.

**Type of Application:** U.S. Army Corps of Engineers permit application # SWG-2024-00046. This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act.

CMP Project No: 24-1152-F2

Federal License and Permit Activities:

Applicant: Nueces County Coastal Parks Department

**Location:** The project site is located at four non-contiguous beach zones of the Gulf of Mexico within Nueces and Kleberg Counties on Mustang and North Padre Islands.

- Zone 1: 1.0-mile stretch of beach extending from Lantana Dr., Pt. Aransas, to the Pt. Aransas south jetty in Nueces County

- Zone 2: 0.79-mile stretch of beach extending from Newport Access Road south to Marker 203 in Nueces County

- Zone 3: 1.19-mile stretch of beach extending from Access Road 4 to Access Road 6 in Nueces County

- Zone 4: 1.79-mile stretch of beach extending from Access Road 6 south to Marker 253 in Kleberg County

#### Latitude and Longitude:

- Zone 1: 27.8295, -97.0510
- Zone 2: 27.6284, -97.1955
- Zone 3: 27.5869, -97.2176
- Zone 4: 27.5656, -97.2286

**Project Description:** The project is for the cleaning and maintenance of beach zones along the Gulf of Mexico. The beach maintenance activities include:

- Removal of all non-natural material (lumber, plastic bottles, cans, etc.) from the beach to an off-site sanitary landfill.

- Movement of sand from above the annual high tide line (AHT) with subsequent placement on the beach between AHT and the mean high waterline (MHW). Activity is for beach grooming and to improve the aesthetics of the beach and to provide safe public drive lanes.

- Re-positioning of sand from the toe of the dune line to just above AHT for beach roadway maintenance.

- Re-positioning of sand/sargassum from drive lanes to base of the fore dunes or above MHW.

- Conduct leveling of the beach, sand placement, and sargassum collection above the MHW.

The applicant proposes an extension of time to continue conducting the previously permitted beach maintenance practices and an amendment to add one additional maintenance area zone, Zone 4, that would be south from the current Zone 3 and reduce the habitat monitoring and beach width measurements in the maintenance zones to only twice a year instead of the currently permitted four times a year. The stated purpose of the project is to conduct beach maintenance activities associated with the periodic removal of sargassum and non-natural items (such as lumber, plastic bottles, cans, etc.) from the public beach and to preserve public vehicular access to the beach. The applicant has stated that they would avoid and minimize the environmental impacts by: conducting maintenance operations during daylight hours; having a monitor on site during all heavy equipment operation during sea turtle nesting season. No mitigation is proposed.

**Type of Application:** U.S. Army Corps of Engineers permit application # SWG-2008-01272. This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. Note: The consistency review for this project may be conducted by the Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

CMP Project No: 24-1150-F1

#### Applicant: Brazoria County

**Location:** The project site is located in the Gulf of Mexico, along the western shoreline south of San Luis Pass, approximately 0.25-mile southeast of the intersection of Texas State Highway 257 (Bluewater Highway) and Palm Street, in Freeport, Brazoria County, Texas.

#### Latitude and Longitude: 29.074459, -95.124113

Project Description: The applicant proposes to discharge a maximum of 273,000 cubic yards of beach quality sand into approximately 35.8 acres of waters of the US below high tide line for the purpose of beach nourishment. The applicant is proposing to use two potential local borrow areas as depicted on the drawings; 1) San Luis Pass boat ramp channel and 2) an adjacent dredge material placement area (DMPA). If these two sites are not available, the applicant is requesting to use one or more of the following upland borrow sites: Vulcan Materials Kyle Pit (Fordyce), Port of Bay City, Bruce Evans Property, Krumwiede (River Bottoms Sands), Sunbird/Sunset Cove Subdivision, Pepper Cove at Terramar Beach Subdivision and Stavanger. Access to the project site will be via County Road 257. The sand material from the boat ramp channel will be transported to the project site through a multi-step process involving hydraulic and/or mechanical methods of material transportation via dredge material pipeline or trucking to the proposed beach nourishment template. The sand material from the DMPA will be mechanically excavated and trucked to the placement area or hydraulically pumped via a material transport pipeline to the beach nourishment template. The hydraulic pipeline will be temporarily placed within the proposed 50-foot-wide pipeline corridor depicted on the drawings in order to reach the proposed beach fill template. The applicant has designed the project to avoid impacts to special aquatic sites including, wetlands, seagrasses, and oyster beds. Best Management Practices such as use of silt curtains and silt fencing will be used during discharge of nourishment material to minimize impacts from turbidity. The applicant is not proposing mitigation.

**Type of Application:** U.S. Army Corps of Engineers permit application # SWG-2023-00492. This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. Note: The consistency review for this project may be conducted by the Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

TRD-202400971 Cynthia Hernandez General Counsel Department of State Health Services Filed: March 5, 2024

During the second half of January 2024, the Department of State Health Services (Department) has taken actions regarding Licenses for the possession and use of radioactive materials as listed in the tables (in alphabetical order by location). The subheading "Location" indicates the city in which the radioactive material may be possessed and/or used. The location listing "Throughout TX [Texas]" indicates that the radioactive material may be used on a temporary basis at locations throughout the state.

In issuing new licenses and amending and renewing existing licenses, the Department's Radiation Section has determined that the applicant has complied with the licensing requirements in Title 25 Texas Administrative Code (TAC), Chapter 289, for the noted action. In granting termination of licenses, the Department has determined that the licensee has complied with the applicable decommissioning requirements of 25 TAC, Chapter 289. In granting exemptions to the licensing requirements of Chapter 289, the Department has determined that the exemption is not prohibited by law and will not result in a significant risk to public health and safety and the environment.

A person affected by the actions published in this notice may request a hearing within 30 days of the publication date. A "person affected" is defined as a person who demonstrates that the person has suffered or will suffer actual injury or economic damage and, if the person is not a local government, is (a) a resident of a county, or a county adjacent to the county, in which radioactive material is or will be located, or (b) doing business or has a legal interest in land in the county or adjacent county. 25 TAC §289.205(b)(15); Health and Safety Code §401.003(15). Requests must be made in writing and should contain the words "hearing request," the name and address of the person affected by the agency action, the name and license number of the entity that is the subject of the hearing request, a brief statement of how the person is affected by the action, what the requestor seeks as the outcome of the hearing, and the name and address of the attorney if the requestor is represented by an attorney. Send hearing requests by mail to: Hearing Request, Radioactive Material Licensing, MC 2835, PO Box 149347, Austin, Texas 78714-9347, or by fax to: (512) 206-3760, or by e-mail to: RAMlicensing@dshs.texas.gov.
