TCEQ received this application on December 12, 2022.

The facility will be located at 231 Wickliffe Road, in Ellis County, Texas 75125. The treated effluent will be discharged to an unnamed tributary, thence to Bear Creek, thence to Red Oak Creek, thence to Upper Trinity River in Segment No. 0805 of the Trinity River Basin. The unclassified receiving water uses are minimal aquatic life use for the unnamed tributary, and high aquatic life use for Bear Creek and Red Oak Creek. In accordance with 30 Texas Administrative Code Section 307.5 and the TCEQ's *Procedures to Implement the Texas Surface Water Quality Standards* (June 2010), an antidegradation review of the receiving waters was performed. A Tier 1 antidegradation review has preliminarily determined that existing water quality uses will not be impaired by this permit action. Numerical and narrative criteria to protect existing uses will be maintained. A Tier 2 review has preliminarily determined that no significant degradation of water quality is expected in Bear Creek or Red Oak Creek, which have been identified as having high aquatic life uses. Existing uses will be maintained and protected. The preliminary determination can be reexamined and may be modified if new information is received. This link to an electronic map of the site or facility's general location is provided as a public courtesy and is not part of the application or notice. On January 10, 1997, the State of Texas received federal approval of the Coastal Management Program (CMP) (62 *Federal Register* pp. 1439 - 1440). Under federal law, federal agency activities and actions affecting the Texas coastal zone must be consistent with the CMP goals and policies identified in 31 TAC Chapter 26. Requests for federal consistency review were deemed administratively complete for the following project(s) during the period of December 21, 2023 to January 5, 2024. As required by federal law, the public is given an opportunity to comment on the consistency of proposed activities in the coastal

zone undertaken or authorized by federal agencies. Pursuant to 31 TAC §§30.20(f), 30.30(h), and 30.40(e), the public comment period extends 30 days from the date published on the Texas General Land Office web site. The notice was published on the web site on Friday, January 12, 2024. The public comment period for this project will close at 5:00 p.m. on Sunday February 11, 2024.

Federal License and Permit Activities:

Applicant: Battleground Oil Specialty Terminal Company, LLC

Location: The project site is located in the San Jacinto River, off the Houston Ship Channel, at 1836 Miller Cut Off Road, in La Porte, Harris County, Texas.

Latitude and Longitude: 29.729731, -95.050761

Project Description: The applicant proposes to discharge 202 cubic yards of riprap into 0.13 acre of estuarine emergent wetlands and 551 cubic yards of riprap into 0.34-acre open water to stabilize 1,050 linear feet of shoreline at an existing marine terminal facility. The applicant was previously authorized to discharge fill material into 7.64 acres of ponds on the project site. These ponds are also proposed to be filled as a result of this project. The applicant proposed to mitigate for the proposed impacts by purchasing credits from the Gulf Coastal Plains Wetlands Mitigation Bank to offset proposed impacts to tidal fringe wetlands.

Type of Application: U.S. Army Corps of Engineers permit application #SWG-2011-00011. This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. Note: The consistency review for this project may be conducted by the Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

CMP Project No: 24-1107-F1

Applicant: Coastal Bend Bays & Estuaries Program

Location: The project site is located within open waters of the Corpus Christi Bay, adjacent to the USS Lexington Museum and the community of North Bay, in Corpus Christi, Nueces County, Texas.

Latitude and Longitude: 27.823538, -97.382233

Project Description: The applicant proposes to armor an existing jetty and install breakwater islands. Specifically, the applicant proposes to place 1,000 linear feet of fill (stone) to armor an existing jetty located west of the U.S.S. Lexington Museum and install five (5) breakwater islands east of North Beach consisting of armor stone and beneficial use dredged material (BUDM). Each island is proposed to have a maximum footprint of approximately 1,120-foot long by 650-foot wide. The applicant proposes a total of 81 acres of impacts below the High Tide Line. Fill material to create the breakwater islands is planned to be either harvested from a nearby Dredge Material Placement Area (DMPA) owned by the applicant (DMPA No. 14) or an adjacent dredging project within the Corpus Christi Ship Channel or Inner Harbor. A temporary pipeline will be utilized to transport material from proposed BUDM No. 14 to the project site. Except for the Rincon Channel crossing, the pipeline is proposed to be floating; within the Rincon Channel the pipeline is proposed to be along the seafloor. The applicant anticipates requiring the pipeline to be in place 12 months. The pipeline will be secured by clump weights where floating and anchor collars where submerged. The applicant is amicable to utilizing a floating pipeline in the nearshore environment to decrease potential impacts to sea grass beds and other sensitive resources. The placed material is planned to be graded, shaped, and planted with native vegetation species to provide additional habitat benefits to the project and aid in the stabilization of the material. The applicant has not proposed compensatory mitigation.

Type of Application: U.S. Army Corps of Engineers permit application # SWG-2023-00292. This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act.
