

## NORTH AMERICAN DEVELOPMENT BANK

1. n/a
2. The North American Development Bank is interested in infrastructure-related issues around fast and secure ports of entry. The effective administration of funding for port of entry-related infrastructure, and opportunities for utilizing the NADBank's lending programs are areas that the NADBank is currently examining.
3. One major issue is the effective administration of the U.S. Department of Transportation's Coordinated Border Infrastructure Program, and devising ways for the effective administration of these funds for projects in Mexico.
4. The NADBank is a potential financier for transportation-related infrastructure, and as such, is in regular communication with state and federal officials in the US and Mexico through groups such as the Border Governors Conference, the Border Trade Alliance, The U.S.-Mexico Chamber of Commerce, etc.
5. n/a
6. The NADBank is currently examining potential opportunities for it to play a greater role in border transportation-related infrastructure as a lender and grant administrator.
7. n/a
8. n/a
9. The NADBank solely dedicates itself to the financing of infrastructure-related projects for environmental improvement in the border region.
10. n/a
11. The NADBank is currently undergoing a strategic planning process with its sister institution, the Border Environment Cooperation Commission (BECC). The result of this effort will be a plan that offers specific recommendations to the NADBank Board of Directors regarding Bank and BECC policies and programs for serving the border region.
12. The North American Development Bank provides technical assistance, grants and loans for environmental infrastructure projects in the U.S.-Mexico border region. The region is defined as 100 KM into the United States, and 300 KM into Mexico. Detailed information regarding the NADBank's programs can be found at [www.nadb.org](http://www.nadb.org), or by calling 210-231-8000.
13. n/a
14. n/a
15. NADBank is financing 97 comprehensive border infrastructure projects, providing \$840 million in financing. These projects represent \$2.5 billion in total investment, indicating that NADBank has effectively leveraged its funding. These projects are benefiting over 11 million people in the border region through:
  - 56 new water and wastewater treatment plants
  - 9 new landfills
  - 64 water and sewer systems
  - 9 street paving projects for more than 9.1 million square meters of paved streetsWhile this is significant process, staggering needs remain in basic water, wastewater and solid waste infrastructure. Current lags are estimated at \$2.5 billion for the U.S.-Mexico border region. Needs through 2030 are estimated at \$10-15 billion. For more information, visit [www.nadb.org](http://www.nadb.org), or call 210-231-8000.
