1. PURPOSE

This document defines the logical record layout for bulk order output files derived in Json format from the business filings bulk order processing.

2. SCOPE

This specification covers the bulk order types listed below and uses the JSON format described in the following sections:

- Daily Filing Update/Replacement
- Weekly Filing Update/Replacement
- Master Unload

This document also defines the logical record types included in the JSON output, to indicate the type of record. These record type codes are: 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, and 12 and associated to Json Node.

3. LOGICAL RECORD DEFINITIONS

3.1.Package-Level Structure

JSON package follows this pattern:

- FilingNumber
- deleteFilingRecord (0..1)
- masterEntityRecord (1)
- masterAddressRecord (1)
- regAgentBusinessRecord (0..1)
- regAgentPersonalRecord (0..1)
- charterOfficerBusinessRecord (0..n)
- charterOfficerPersonalRecord (0..n)
- charterNamesRecord (0..n)
- associatedEntityRecord (0..n)
- filingHistoryRecord (0..n)
- auditLogRecord (0..n)

3.2.Record Catalog Matrix

Record Code	JSON Node	Cardinality per Filing	Record Type

3.3.Data Type Rules Matrix

Rule Area	Rule
Identifiers	Treat filing numbers, document numbers, and code-like values as string unless arithmetic is required
Record codes	Record code fields are stored as string in the JSON samples, e.g. "2", "8", "12"
Numeric attributes	Some status/type/sequence fields appear as number/integer, e.g. masterStatusId, charterNameId, coPersonalId
Dates	Dates are commonly stored as 8-character string in YYYYMMDD format, e.g. 19940914, 20130711, 20160112
Flags	Flags appear as integer/bool or null, e.g. 1, 0/ true, false, or null
Blank character data	Character fields may be empty string ""
Null handling	Many fields may be null, including dates, suffixes, arrays, and optional records
Repeating groups	Child record collections appear as arrays with 0..n cardinality
Country/state/ZIP	Store as string, even when numeric looking
Tax IDs / filing IDs	Store as string to preserve leading zeros and formatting intent
