Notice and Opportunity to Comment on Requests for Consistency Agreement/Concurrence Under the Texas Coastal Management Program

On January 10, 1997, the State of Texas received federal approval of the Coastal Management Program (CMP) (62 *Federal Register* pp. 1439 - 1440). Under federal law, federal agency activities and actions affecting the Texas coastal zone must be consistent with the CMP goals and policies identified in 31 TAC Chapter 26. Requests for federal consistency review were deemed administratively complete for the following project(s) during the period of June 15, 2026 to June 26, 2026. As required by federal law, the public is given an opportunity to comment on the consistency of proposed activities in the coastal zone undertaken or authorized by federal agencies. Pursuant to 31 TAC §§30.20(f), 30.30(h), and 30.40(e), the public comment period extends 30 days from the date published on the Texas General Land Office web site. The notice was published on the web site on Friday, July 3, 2026. The public comment period for this project will close at 5:00 p.m. on Sunday, August 2, 2026.

Federal Agency Activities:

Applicant: U.S. Army Corps of Engineers, Galveston District

Location: The General Permit (GP) will be valid within navigable waters of the U.S. within the Galveston District Area of Operations boundaries, excluding waters located in Louisiana and the Gulf of America.

Project Description: This GP authorizes bed-leveling maintenance activities for currently authorized and serviceable ship berths, slips, and non-federal channels in navigable waters of the U.S. The GP is conditioned to result in no more than minimal impacts. The GP does not authorize temporary impacts or permanent loss of special aquatic sites and does not require compensatory mitigation. The intent of this Regional General Permit is to streamline the regulatory authorization for routine sediment redistribution that maintains authorized historic or engineered design depths without the need for extraction-based dredging operations.

Type of Application: U.S. Army Corps of Engineers permit application #SWG-2026-00365. This application will be reviewed pursuant Section 10 of the Rivers and Harbors Act of 1899.

CMP Project No: 26-1171-F2

Federal License and Permit Activities:

Applicant: TGS

Location: The project site is located within Cedar Bayou, adjacent to an existing dock facility, 1.2 miles southwest of the intersection of Farm to Market Road 1405 and Oscar Nelson Junior Drive, in Baytown, Chambers County, Texas.

Latitude and Longitude: 29.71106, -94.93357

Project Description: The applicant proposes reauthorization for previously approved work (SWG-2013-00821, originally issued May 12, 2014, and modified April 23, 2020), including mechanically dredging approximately 73,670 cubic yards (CY) of material from 3.30 acres of Cedar Bayou to reach a -12-foot NAVD 88 depth for construction of a new barge dock. The project includes permanent discharge of fill material into 0.05 acre of unvegetated bay bottom to install a 624-linear-foot bulkhead and 725 CY of concrete matting for bank stabilization and permanently filling 0.33 acre of estuarine wetlands. The proposed upland placement area for dredged material is 4.93 acres and is located approximately 700 feet southeast of the impact site.

The applicant has stated that they have avoided and minimized environmental impacts to waters of the United States by designing the project to have the minimal footprint to achieve the project purpose. The project will avoid interference with public navigation and minimize adverse effects to aquatic resources through the use of Best Management Practices (BMPs) such as sediment fences, drainage modifications, and vegetative cover. The 2020 permit modification included a special condition requiring the purchase of 2.8 tidal mitigation credits from the Gulf Coast Plains Mitigation Bank to offset unavoidable impacts to waters of the US. The required credits were purchased on May 19, 2020.

Type of Application: U.S. Army Corps of Engineers permit application #SWG-2013-00821. This application will be reviewed pursuant Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbors Act of 1899. Note: The consistency review for this project may be conducted by The Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

CMP Project No: 26-1162-F1

Applicant: Travis Ahlhorn

Location: The project site is located in Boggy Bayou, at 802 Taylor Avenue, in Port O'Connor, Calhoun County, Texas.

Latitude and Longitude: 28.454177, -96.416734

Project Description: This is an After-the-Fact permit application request. The applicant proposes to retain unauthorized discharges of fill material, excavation of a canal, construction of a bulkhead, and construction of a pier within waters of the United States (WOTUS) for the construction of a commercial development. Discharges included the placement of fill material into approximately 0.8-acre of wetlands consisting of 0.3-acre of tidal wetlands and 0.5-acre of non-tidal wetlands. Excavation included the removal of approximately 30,400 cubic yards of material to create an approximately 0.2-acre canal measuring 300-foot-long by 20-foot-wide and 4-foot deep with an adjoining 40-foot by 40-foot boat slip. The pier measures 210-square-foot total, extends 33 feet into Boggy Bayou, and sits 5-foot above the mean high water (MHW). Components of the pier include a 4-foot by 27-foot walkway and a 6-foot by 17-foot T-head.

The applicant has not proposed any compensatory mitigation. The USACE will determine the type and amount of compensatory mitigation necessary to offset losses of waters of the United States which may have resulted from the activity in accordance with 33 CFR § 332.

Type of Application: U.S. Army Corps of Engineers permit application #SWG-2013-00461. This application will be reviewed pursuant Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbors Act of 1899. Note: The consistency review for this project may be conducted by The Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

CMP Project No: 26-1163-F1

Applicant: Port of Bay City Authority

Location: The project site is located within Matagorda Harbor, at 189 County Road 213, in Matagorda, Matagorda County, Texas.

Latitude and Longitude: 28.69568, -95.95482

Project Description: The applicant proposes to discharge approximately 905 cubic yards (CY) of fill material into 0.69-acre of Matagorda Harbor for the Matagorda Harbor Improvement Project. The project will include excavation and construction of a four-lane public boat launch facility with related appurtenances, including a parking lot and access road, floating docks, shoreline protection, lighting, public restroom, a fish cleaning station, fencing, educational signage, and replacing the existing concrete bag revetement. Specifically, the project consists of the following components:

Bank Stabilization and Boat Ramp: The applicant proposes to discharge 905 CY of fill material into 0.41-acre below the mean high water line, including 349 CY of rock and concrete within 0.17-acre for construction of a boat ramp, and 556 CY of rock and concrete in 0.24-acre to install approximately 50 linear feet of shoreline protection adjacent to the boat ramp. The project also includes excavation of 860 CY of fill material from 0.20-acre to a maximum depth of -10 feet below mean high tide, including 657.6 CY of material within 0.13-acre for the boat ramp and 202.8 CY of material within 0.08-acre for shoreline stabilization. The dredged material will be placed in a designated upland placement area on the applicant's property.

Pier and Dock: The applicant proposes work associated with the construction of a 280-square-foot boarding pier and 420-square-foot floating dock structure supported by 57 pilings. The piers will extend 102 feet into Matagorda Harbor.

The applicant has stated that they have avoided and minimized environmental impacts to waters of the United States associated with the proposed activity by utilizing operational controls to minimize suspended sediments during construction and dewatering, avoiding special aquatic sites, and restricting equipment access to designated work areas. The project will also implement best management prac-

tices (BMPs) for construction activities and limit pile driving to the minimum duration necessary. The applicant has not proposed any compensatory mitigation because the project does not impact special aquatic sites, and the project footprint is the minimum size to achieve the project purpose. The USACE will determine the type and amount of compensatory mitigation necessary to offset losses of waters of the United States which may result from the proposed activity in accordance with 33 CFR § 332.

Type of Application: U.S. Army Corps of Engineers permit application # SWG-2026-00259. This application will be reviewed pursuant Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbors Act of 1899. Note: The consistency review for this project may be conducted by The Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

CMP Project No: 26-1167-F1

Applicant: Cheniere Energy

The project site is located in Corpus Christi Bay, at the La Quinta Ship Channel and the La Quinta Turning Basin, southeast of Gregory, in San Patricio County, Texas.

Latitude and Longitude: 27.878231, -97.258999

Project Description: The applicant proposes constructing the CCL Stage 4 Project, a new marine facility, associated with an expansion of their existing liquefied natural gas terminal. The proposed CCL Stage 4 Project consists of liquefaction trains, LNG storage tanks, flares, and supporting infrastructure, all of which would occur in uplands. Jurisdiction work associated with the proposed expansion includes one new marine berth, a jetty (LNG loading dock), and a marine offloading facility ("MOF"). Specifically, work within the Corps' jurisdiction includes the following:

- New dredging of 8.09 acres of open water, by manual or hydraulic dredging
- New dredging of 0.84 acre of tidal wetlands, by manual or hydraulic dredging
- Placing fill material into 0.55 acre of tidal wetlands for fill slope protection

The proposed project includes construction of the following structures in Corpus Christi Bay adjacent to the La Quinta Ship Channel:

- A new marine jetty with mooring and breasting dolphins, walkways and catwalks, including the above noted dredging to a depth of -45 feet below MLLW +2 foot over dredge, +2 foot advance maintenance
- A roll-on-roll-off dock and a life-on life-off dock for use as MOFs, including the above noted dredging to a depth of -30 feet below MLLW +2 foot over dredge, +2 foot advance maintenance
- Sheet pile bulkheading along the shoreline
- Placement of rip rap for shoreline protection along the shoreline and in dredged areas adjacent to the shoreline

Structures would be constructed a minimum of 562 feet from the top cut of the federal channel to a maximum of 956 feet from the top cut of the federal channel.

- The proposed project would require a total of 1.2 million cubic yards to be dredged in one cycle as new work dredging. Depending on capacity and availability, hydraulically dredged material is proposed to be placed into Dredged Material Placement Areas (DMPAs) 13, 14, Good Hope, and Ingleside. If found to be suitable, mechanically dredged material is proposed to be used for fill on the project site.

- Impacts associated with the proposed work would include dredging impacts to 0.55 acre of tidal high marsh, 0.29 acre of tidal low marsh, and 8.09 acres of seagrass beds. In addition, the 0.55 acre of tidal high marsh is proposed to be filled to construct and stabilize the sheet pile bulkhead (see impacts table on Page 13 of the project plan set https://www.swg.usace.army.mil/Portals/26/SWG-2022-00304_20260616_Project%20Plans_Red.pdf).

The proposed project would require a total of 1.2 million cubic yards to be dredged in one cycle as new work dredging. Depending on capacity and availability, hydraulically dredged material is proposed to be placed into Dredged Material Placement Areas (DMPAs) 13, 14, Good Hope, and Ingleside. If found to be suitable, mechanically dredged material is proposed to be used for fill on the project site.

Impacts associated with the proposed work would include dredging impacts to 0.55 acre of tidal high marsh, 0.29 acre of tidal low marsh, and 8.09 acres of seagrass beds. In addition, the 0.55 acre of tidal high marsh is proposed to be filled to construct and stabilize the sheet pile bulkhead (see impacts table on Page 13 of the project plan set).

The applicant has stated that they have avoided and minimized environmental impacts to waters of the United States associated with the proposed activity through design considerations. Impacts to 0.49 acres of tidal wetland (0.11 acres high marsh and 0.39 acres low marsh) and 1.02 acres of seagrass were avoided through design considerations. The applicant has proposed to mitigate for the unavoidable loss of tidal wetlands and seagrass through compensatory mitigation and has prepared conceptual mitigation plan. At this time the proposed conceptual compensatory mitigation has not been verified or evaluated. The USACE will determine the type and amount of compensatory mitigation necessary to offset losses of waters of the United States which may result from the proposed activity in accordance with 33 CFR § 332.

Type of Application: U.S. Army Corps of Engineers permit application #SWG-2007-01637. This application will be reviewed pursuant Section 404 of the Clean Water Act and Sections 10 and 14 of the Rivers and Harbors Act of 1899. Note: The consistency review for this project may be conducted by The Railroad Commission of Texas as part of its certification under §401 of the Clean Water Act. The U.S. Army Corps of Engineers Galveston District has found that this permit request meets the terms of Executive Order 14156 and is therefore subject to special emergency permitting procedures and an expedited review process.

CMP Project No: 26-1168-F1e

Applicant: Rio Grande LNG Train 6, LLC

Location: The project site is located along the Brownsville Ship Channel (BSC), at the Existing Rio Grande liquified natural gas terminal, in Cameron County, Texas.

Latitude and Longitude: 26.016386, -97.261784

Project Description: The applicant proposes to mechanically and hydraulically dredge approximately 1.2 million cubic yards (CY) of material to create a berth (Berth 3) at a depth of -45 feet mean lower low water. Dredge material will be placed in dredge material placement areas (DMPA) 3, 4A, 4B, 5A, 5B or 7 as capacity allows. Placement operations during dredging may require the temporary installation of a submerged pipeline to transport the dredge material. To stabilize the shoreline, Berth 3 will have 12,000 CY of rip rap to approximately -16 feet elevation. Rip rap will be placed along the slopes using a long reach excavator or similar equipment from land or barge.

Structures at Berth 3 will consist of four breasting dolphins, six mooring dolphins, and a liquid natural gas (LNG) loading platform. Access to the LNG loading platform will be provided by a trestle that will sup-

port a 15-foot-wide roadway, a 4-foot-wide personnel walkway, LNG product piping, and auxiliary mechanical and electrical systems. The loading platform and trestle will be supported by steel piles. In addition, catwalks will be provided between the dolphins and the loading platform to provide personnel access. The breasting and mooring dolphins will be equipped with remote release hook assemblies with an integrated capstan.

The purpose of Berth 3 is to enable additional LNG carriers (LNGCs) to arrive at the RGLNG Terminal to accommodate the increased LNG production and to increase the efficiency and reliability of LNGC 2 loading while minimizing cargo loading delays due to adverse weather, maintenance activities, and unexpected vessel traffic; and optimizing LNG cargo-loading operations.

The applicant has stated the proposed project will not disturb special aquatic features, nor will the Project result in a loss of WOTUS; therefore, compensatory mitigation is not proposed. The Corps will determine the type and amount of compensatory mitigation necessary to offset losses of waters of the United States which may result from the proposed activity in accordance with 33 CFR § 332.

Type of Application: U.S. Army Corps of Engineers permit application #SWG-2015-00114. This application will be reviewed pursuant Section 404 of the Clean Water Act and Sections 10 and 14 of the Rivers and Harbors Act of 1899. Notice Reinstating Clarifications to the Definitions of Tetrahydrocannabinols and Marijuana Extract to the 2021 Schedule of Controlled Substances, Pursuant to the Opinion Delivered by the Supreme Court of Texas on May 1, 2026.

Notice Reinstating Clarifications to the Definitions of Tetrahydrocannabinols and Marihuana Extract to the 2021 Schedule of Controlled Substances, Pursuant to the Opinion Delivered by the Supreme Court of Texas on May 1, 2026.

On November 8, 2021, in the case *Sky Marketing Corp., et al. v. Texas Department of State Health Services, and Dr. Jennifer Shuford*, in her official capacity as Commissioner of the Texas DSHS, Travis County District Court Judge Jan Soifer ordered the Department to "remove from its currently published Schedule of Controlled Substances the most recent modifications of the definitions to the following terms: '* (31) Tetrahydrocannabinols' and '* (58) Marihuana extract,' and any subsequent publications of the same (if any) until further order of this Court." DSHS published a notice of compliance with this order on January 21, 2022, 47 *TexReg* 175.

On May 1, 2026, the Supreme Court of Texas delivered its opinion reversing the judgment of the court of appeals as to the ultra vires and APA claims and reversing the trial court's order that granted the temporary injunction. On June 5, 2026, the mandate was issued dismissing Plaintiffs' claims.

DSHS therefore issues this notice reinstating previous modifications made to the definitions of tetrahydrocannabinols and marihuana extract in the 2021 Schedules of Controlled Substances. These modifications resulted from the Commissioner's objection to changes made by the Drug Enforcement Agency to the definitions to the extent that the definitions allow for the presence or addition of tetrahydrocannabinols aside from the presence of delta-9-tetrahydrocannabinol, including isomers and variants which may have pharmacological or psychoactive properties.

In the capacity as interim Commissioner of the Texas Department of State Health Services, Imelda Garcia, MPH, reinstates the definitions of tetrahydrocannabinols and marihuana extract as modified prior to the temporary injunction issued by the trial court.

Note: Changes are marked by an asterisk (*).

Rio Grande Council of Governments

Request for Qualifications for Professional Engineering Services for Region E Water Planning Group

1. Background and General Information

Senate Bill 1 (SB 1), passed by the 75th Texas Legislature, mandated the Texas Water Development Board (TWDB) to implement a statewide water planning program to ensure that the water needs of all Texans are met looking forward 50 years. In response to this legislation, TWDB adopted state and regional water planning rules, delineated the state into sixteen regional areas, and selected the initial members for the Regional Water Planning Group serving in each area.

The Far West Texas Water Planning Group (FWTWPG) has been designated Region E and consists of all or parts of the following seven (7) Texas counties: Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Presidio, and Terrell.

The FWTWPG is responsible for preparing and adopting a regional water plan for its area and hires a consultant to assist the Group with developing the engineering, hydrological, environmental, legal, and institutional components of the plan. The planning process begins with the collection and analyses of many types of information related to regional water supplies and the demands placed on them by area users. The Group decides how future water needs may be met and includes in their water plan information about water supplies and demand, water quality problems affecting the water supply, and the social and economic characteristics of the region.

The plan will also identify water supply threats to agriculture and natural resources. Information concerning current preparations for drought and the status of other water plans in the region will also be reviewed during plan development. In addition, the plan addresses the prioritization of water management strategies, based on factors related to strategy cost, year of need, amount of water the strategy provides, and so on.

Before the plan can be finalized, FWTWPG must provide for public input in the planning process, hold public meetings, and furnish a draft report of the plan for public review and comment. The water plan must address the needs of all water users and suppliers in their region (except certain political subdivisions that decide not to participate.) Once this process has been completed, the final adopted plan will be forwarded to TWDB for approval and incorporation into a comprehensive state water plan.

The Rio Grande Council of Governments (RIOCOC) serves as the administrative entity and public involvement coordinator for the FWTWPG. RIOCOC's role in the regional water planning process has three broad aspects:

- Provides administrative support for the FWTWPG
- Provides fiscal management of TWDB funds that have been passed through to technical consultants to the Planning Group; and

- Develop and implement a comprehensive public involvement strategy to maximize local input and buy-in to the planning process.

- The RIOCOC therefore acts as the fiscal agent and project manager for the regional planning effort.

RIOCOC, is a political subdivision of the state codified pursuant to the Texas Local Government Code, Chapter 391, is the regional organization through which local governments consider issues and cooperate in solving area wide problems. Through RIOCOC, local governments also initiate efforts in anticipating and preventing problems, thus saving public funds. In order to address the needs of citizens and businesses, local governments are providing leadership to guide regional development wisely and manage change constructively.

2. SOLICITATION

The RIOCOC, on behalf of the Region E FWTWPG, is soliciting Statements of Qualifications (SOQ) from engineering/planning firms qualified to provide professional consulting services related to Regional Water Planning activities. The RIOCOC is the administrative entity for the FWTWPG, and as such will be the contracting party on behalf of the Group. The SOQ should be submitted in accordance with the instructions listed in Item 4.B. below.

3. SCOPE OF WORK

The required Scope of Work for the seventh cycle of the 2031 Regional Water Plans can be found here, <https://www.twdb.texas.gov/waterplanning/rwp/planningdocu/2031/index.asp>. The Scope of work is to be amended to incorporate remaining planning tasks that are necessary to complete the 2031 Regional Water Plans at a later date. Respondents may contact the following individual regarding clarification of the Request for Qualification: Annette Gutierrez, Executive Director, RIOCOC, at annetteg@riococ.org.

Notes and Comments

Comment to 1990 change: To require notice and hearing before a court determines to impose sanctions, to specify that any sanction imposed be appropriate, and to eliminate the 90-day "grace" period provided in the former version of the rule.

Comment to 2026 change: Rule 13 has been rewritten to modernize the rule and reinforce the obligation of attorneys and self-represented parties to verify documents filed with the court. Paragraphs (a) and (b) incorporate the requirements in current Rule 57. Paragraph (c)(1) is adopted principally to address concerns about the improper use of artificial intelligence in filings, which increases the risk of fabricated authorities, quotations, and holdings appearing in court filings. Verifying a filing for accuracy is important, regardless of whether artificial intelligence was

used. The rule is not intended to govern disputes regarding the interpretation, application, or persuasive force of existing authorities. Paragraph (e)(1) requires the court to give the signer a reasonable opportunity to respond before imposing a sanction. Paragraph (e)(2) imports available sanctions from Rule 215, tailoring them for filings instead of discovery.

 - (1) reviewed the filing and verified its accuracy, including that the legal citations, quotations, holdings, and record citations are not fabricated; and

(2) to the best of the signer's knowledge, information, and belief formed after reasonable inquiry, the filing is not groundless, brought in bad faith, or brought for the purpose of harassment.

(4) Order. A sanction imposed under this rule must be set forth in a written order that states the reasons for the sanction.

Notes and Comments

Comment to 2026 change: Rule 9.1(d) is added to clarify that by signing a filing, the signer is making certain representations to the court. One of those representations is that the signer reviewed and verified the filing. Paragraph (d)(1) is adopted principally to address concerns about the improper use of artificial intelligence in filings, which increases the risk of fabricated authorities, quotations, and holdings appearing in court filings. Verifying a filing for accuracy is important, regardless of whether artificial intelligence was used. The rule is not intended to govern disputes regarding the interpretation, application, or persuasive force of existing authorities. Rule 9.1(f) includes express sanction provisions to avoid uncertainty over an appellate court's authority to impose sanctions in this context.

By including an express sanctions provision in (f), the Court does not intend to change or comment on—by negative implication or otherwise—an appellate court’s existing authority to impose sanctions for noncompliance with these rules generally.

Rule 52. Original Proceedings

52.11. ~~Groundless Petition or Misleading Statement or Record~~Sanctions

~~On motion of any party or on its own initiative, the court may—after notice and a reasonable opportunity to respond—impose just sanctions on a party or attorney who is not acting in good faith as indicated by any of the following:~~

~~(a)—filing a petition that is clearly groundless;~~

~~(b)—bringing the petition solely for delay of an underlying proceeding;~~

~~(c)—grossly misstating or omitting an obviously important and material fact in the petition or response; or~~

(a) ~~(d)~~Omissions. In addition to sanctions for violations of Rule 9, the court may impose appropriate sanctions for filing an appendix or record that is clearly misleading because of the omission of obviously important and material evidence or documents.

(b) Notice, Opportunity to Respond, and Written Order Required. The court must follow the notice, response, and order procedures and other requirements in Rule 9.

Notes and Comments

Comment to 2026 change: Rule 52 is amended to align the requirements more closely with Rule 9 and Rule 53.
