Reagor, as Trustee of the Charles Alan Reagor Family Trust, and Piedmont Investment Ventures, LP, a Texas limited partnership (Petitioners), filed a petition for creation of Williamson County Municipal Utility District No. 69 (District) with the Texas Commission on Environmental Quality (TCEQ). The petition was filed pursuant to Article XVI, §59 of the Constitution of the State of Texas; Chapters 49 and 54 of the Texas Water Code; 30 Texas Administrative Code Chapter 293; and the procedural rules of the TCEQ. The petition states that: (1) the Petitioners hold title to a majority in value of the land to be included in the proposed District; (2) there are no lienholders on the property to be included in the proposed District; (3) the proposed District will contain approximately 169.89 acres located within Williamson County, Texas; and (4) none of the land within the proposed District is within the corporate limits or extraterritorial jurisdiction of any city. The petition further states that the proposed District will design, construct, acquire, improve, extend, finance, and issue bonds to: (1) maintain, operate, and convey an adequate and efficient water works and wastewater system for domestic purposes; (2) maintain, operate, and convey works, improvements, facilities, plants, equipment, and appliances helpful or necessary to provide more adequate drainage for the proposed District; (3) control, abate, and amend local storm waters or other harmful excesses of waters; (4) maintain, operate, and convey park and recreational facilities; (5) convey roads and improvements in aid of roads; and (6) maintain, operate, and convey such other additional facilities, systems, plants, and enterprises as shall be consistent with all of the purposes for which the proposed District is created. Additionally, the Petitioners requests that the proposed District be granted the power, under the authority of Article III, Section 52 of the Texas Constitution, as amended, to design, acquire, construct, finance, issue bonds for, and convey to the State, a county, or a municipality for operation and maintenance one or more roads, or any improvement in aid of such roads, pursuant to Section 54.234 of the Texas Water Code, as amended.

According to the petition, a preliminary investigation has been made to determine the cost of the project, and it is estimated by the Petitioners that the cost of said project will be approximately \$42,350,000 (\$36,150,000 for water, wastewater, and drainage, \$4,800,000 for roads, and \$1,400,000 for recreational).

Notice and Opportunity to Comment on Requests for Consistency Agreement/Concurrence Under the Texas Coastal Management Program

On January 10, 1997, the State of Texas received federal approval of the Coastal Management Program (CMP) (62 *Federal Register* pp. 1439 - 1440). Under federal law, federal agency activities and actions affecting the Texas coastal zone must be consistent with the CMP goals and policies identified in 31 TAC Chapter 26. Requests for federal consistency review were deemed administratively complete for the following project(s) during the period of August 18, 2025 to September 4, 2025. As required by federal law, the public is given an opportunity to comment on the consistency of proposed activities in the coastal zone undertaken or authorized by federal agencies. Pursuant to 31 TAC §§30.20(f), 30.30(h), and 30.40(e), the public comment period extends 30 days from the date published on the Texas General Land Office web site. The notice was published on the web site on Friday, September 12, 2025. The public comment period for this project will close at 5:00 p.m. on Sunday, October 12, 2025.

Federal License and Permit Activities:

Applicant: Amazon Prime Air

Location: Amazon is proposing 22 Prime Air Drone Delivery Centers (PADDCs) with one location, STX4, located within the coastal zone at 10611 Red Bluff Road, Pasadena, Harris County, Texas. The site is north of the Armand Nature Center and the closest residential area is located 1.38 miles to the west of the site.

Project Description: Amazon Prime Air anticipates operating up to 1,000 delivery flights per operating day, 7 days per week, from each of the 22 PADDCs. These operational levels would result in a projected total of approximately 365 operating days and 365,000 delivery operations per year for each PADDC, based on the scope of the Proposed Action. The operations would occur between 7 A.M. and 10 P. M. and are anticipated to be distributed evenly across each operating area. Prime Air will utilize the MK30 drone, which has an operating range of 7.5 mi from the PADDC, with a potential operating area of 174 square miles. The drone departure and arrival paths from and to each PADDC would generally correspond to the geographical location of the package delivery address. PADDC STX4 is an existing facility and package deliveries along the shoreline would be restricted to developed areas of land and would not extend beyond the residential properties on the shoreline. STX4 is the only site located within the coastal zone and is therefore the only PADDC undergoing a federal consistency review.

The MK30 is an electric powered drone that has a vertical take-off and landing, and transitions to wing borne flight using wing lift during *en route* flight. The drone systems include hardware and software designed for safety and efficiency. The airframe is composed of staggered wings, the propulsion system includes a rechargeable lithium-ion battery, and six (6) motors that include propellers designed for noise reduction, the package delivery system contains the package in a two-door interior receptacle, and a camera and avionics system that has redundancy for critical systems. The drone weighs approximately 78 lbs. and has a maximum takeoff weight of 83.2 lbs., which includes a maximum payload of 5 lbs. It has a maximum operating range of 7.5 mi and can fly up to 400 ft above ground level (AGL) at a maximum cruise speed of 73 mph (64 knots) during horizontal flight.

A typical flight profile can be broken into the following general flight phases: launch, *en route* outbound, delivery, *en route* inbound, and landing. After launch, Prime Air's MK30 drone would rise to an altitude of less than 400 ft AGL and follow a predefined route to its delivery site. Aircraft would typically fly *en route* at between approximately 180 and 377 ft AGL, except when descending to drop a package. Pack-

ages would be carried internally in the drone's fuselage. When making a delivery, the drone descends, opens a set of payload doors, and drops the package to the ground from approximately 13 ft AGL. Prime Air's drone would not touch the ground in any place other than the PADDC (except during safe contingent landings) and will remain airborne throughout the operation including the delivery stage. After the package is dropped, the MK30 drone climbs vertically and follows its predefined route back to the PADDC at its assigned altitude.

Type of Application: Draft Environmental Assessment to amend Federal Aviation Administration air carrier Operation Specifications authorization.

CMP Project No: 25-1271-F1

Applicant: Space Exploration Technologies, Inc

Location: The project site is located in Boca Chica at the approximately 55-acre Starbase Launch Area directly south of State Highway 4, in Starbase, Cameron County, Texas. The proposed mitigation bank (SWG-2025-00405) is located within South Bay directly north of Starbase, Cameron County, Texas.

Latitude and Longitude:

Project Location: 25.996241, -97.154774

Mitigation Bank: 26.002666, -97.192311

Project Description: The purpose of the proposed Project is to expand the existing launch pad and infrastructure at the Starbase Launch Area to support Starship/Super Heavy vehicle and pad upgrades, increased launch cadence, and to provide rapidly reusable launch and landing infrastructure. The applicant proposes to construct an approximately 21-acre infrastructure expansion to support the existing Starbase Launch Area. The proposed infrastructure would result in permanent impacts to approximately 5.80 acres of emergent wetland and approximately 9.65 acres of wind-tidal flats for a total of 18.15 acres. The proposed infrastructure would consist of a new controlled access entrance road, launch infrastructure components which may include test/staging pads, water and propellant storage, isolation and purging facilities, support equipment staging, blast walls, and internal roadways. Silt fencing would be installed around the permitted limits of disturbance to minimize erosion and sedimentation impacts to receiving waters and to ensure construction equipment remains within the permitted Project limits. The Project would make use of existing impervious areas to the extent practicable when staging construction equipment.

The applicant proposes to mitigate for the proposed impacts by purchasing compensatory mitigation credits from the proposed Rockhands Mitigation Bank (SWG-2025-00405). The proposed Rockhands Mitigation Bank is in the Prospectus Phase of mitigation bank development and is anticipated to have a sufficient number of credits available by early 2026. The Applicant proposes to offset aquatic resource losses resulting from the Project at a 1:1 credit-to-impact ratio. To the extent available, in-kind credits would be purchased to offset losses resulting from the Project. Should sufficient in-kind credits not be available for purchase from the Rockhands Mitigation Bank, the applicant proposes to purchase out-of-kind credits at a 1.5:1 credit to impact ratio.

Type of Application: U.S. Army Corps of Engineers permit application SWG-2012-00381. This application will be reviewed pursuant to Section 404 of the Clean Water Act. Note: The consistency review for this project may be conducted by the Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

CMP Project No: 25-1275-F1
