Notice to Persons Interested in Energy Efficiency Building Codes for Residential, Commercial, and Industrial Construction

Pursuant to 34 TAC §19.52, the State Energy Conservation Office (SECO) is accepting written comments on the energy efficiency chapter of the 2024 International Residential Code, published May 2024, for single-family residential construction. Additionally, SECO is accepting written comments on the 2024 International Energy Conservation Code, published August 14, 2024, for all commercial and industrial construction and in residential construction other than single-family residential construction. Comments must be received no later than 30 days after the publication date of this notice.

To achieve energy conservation in single-family residential construction, Health and Safety Code, §388.003(a), adopted the energy efficiency chapter of the International Residential Code (IRC) as it existed on May 1, 2015, as the energy code for use in this state for all single-family residential construction. Health and Safety Code, §388.003(a), authorizes SECO to amend or adopt and substitute for that energy code the latest published edition of the IRC's energy efficiency chapter, after required analysis and based on written findings on the chapter's stringency from the Energy Systems Laboratory at the Texas A&M Engineering Experiment Station ("Laboratory"). SECO will receive the Laboratory's recommendation on the efficacy of the 2024 IRC's energy efficiency chapter compared to the 2015 IRC's energy efficiency chapter. Health and Safety Code, §388.003(b-3), requires the Laboratory to consider the written comments that SECO receives under this notice.

To achieve energy conservation in all commercial and industrial construction and in residential construction other than single-family residential construction, Health and Safety Code, §388.003(b), adopted the International Energy Conservation Code (IECC) as it existed on May 1, 2001, as the energy code for use in this state for all such construction. Health and Safety Code, §388.003(b), authorizes SECO to amend or adopt and substitute for that energy code the latest published edition of the IECC based on the Laboratory's written findings on the edition's stringency. In 2015, the Laboratory found that the 2015 IECC would result in equivalent or better residential and commercial energy efficiency and air quality than the 2001 IECC. Effective November 1, 2016, SECO adopted the IECC as it existed on May 1, 2015, as the energy code for all commercial and industrial construction and in residential construction other than single-family residential construction. SECO will receive the Laboratory's recommendation on the efficacy of the 2024 IECC compared to the 2015 version of the IECC. Health and Safety Code, §388.003(b-3), requires the Laboratory to consider the written comments that SECO receives under this notice.

SECO encourages comments on the 2024 IECC and the 2024 IRC's energy efficiency chapter from any persons interested in energy efficiency building codes for residential, commercial, and industrial construction, including without limitation: commercial and residential builders; architects and engineers; municipal, county, and other local government authorities; environmental groups; public and private electric, gas, and water utilities; and manufacturers of building materials and products. You can purchase copies of the 2015 IECC and IRC as well as the 2024 IECC and IRC from the International Code Council web-

site at <https://shop.iccsafe.org/international-codes/2024-international-energy-conservation-coder.html>. Also, you may view copies of these codes during regular business hours at SECO's office located at 111 E. 17th Street, Suite 610.14, Austin, Texas 78774. You may submit written comments by email to 2024CodeComments@cpa.texas.gov, or by mail to State Energy Conservation Office, Comptroller of Public Accounts, P.O. Box 13528, Austin, Texas 78711-3528.

All comments submitted no later than 30 days after the publication date of this notice will be forwarded to the Laboratory.

Issued in Austin, Texas, on October 13, 2025.

Notice of Completion of Technical Review for Minor
Amendment Radioactive Material License Number R04100

APPLICATION. Waste Control Specialists LLC (WCS) has applied to the Texas Commission on Environmental Quality (TCEQ) for a minor amendment to a radioactive material license that authorizes the commercial disposal of Low-Level Radioactive Waste (LLRW) and storage and processing of radioactive substances. The facility is located at 9998 State Highway 176 West, one mile north of State Highway 176 and 250 feet east of the Texas and New Mexico State Line (30 miles west of Andrews, Texas) in Andrews County, Texas. The application for a minor amendment was received on July 19, 2024 with modifications to the amendment application received January 14, 2025, April 4, 2025, and July 15, 2025.

The facility is located at 9998 State Highway 176 West in Andrews County, Texas. The following link to an electronic map of the site or facility's general location is provided as a public courtesy and is not part of the application or notice. For the exact location, refer to the application. <https://tceq.maps.arcgis.com/apps/webappviewer/index.html?id=db5bac44afbc468bbddd360f8168250f&marker=-103.063055%2C32.4425&level=12>.

PRELIMINARY DECISION. The TCEQ Executive Director has completed the technical review of the amendment application and prepared a draft license. The draft license, if approved, would establish the conditions under which the facility must operate. The Executive Director has made a preliminary decision that this license, if issued, meets all statutory and regulatory requirements.

The TCEQ Executive Director has determined that a minor amendment to the license is appropriate because it does not pose a detrimental impact and is in consideration of maintaining public health and safety, worker safety, and environmental health. The license will be amended to authorize the reduction of the concrete strength requirement for the Modular Concrete Canisters (MCCs) from 5,000 psi to 4,000 psi and the 2,000 psi grout void-fill material requirement with 200 psi controlled low-strength material (CLSM); the modification of the requirement that 2,000 psi concrete be used for backfill of rubble and debris bulk waste to allow the use of 200 psi CLSM; the construction of a new cask off-load facility; that in-situ red bed clay is a material "technologically equivalent or superior" to the material applied to the disposal facility liner for temporarily sealing the catch basins; that catch basins and ledge ditches with an unlined gravel subsurface drain and sump do not need to have an automatic pumping system or an extra foot of freeboard if it is designed for the 100-year, 24-hour storm event; the revision of procedure EV-1.0.0, *Consolidated Radiological Environmental Monitoring Program* (REMP), to update the list of monitoring wells, remove C-14, I-129, and Kr-85 as key radionuclides monitored for several media, and remove the use of cartridges for low volume air sampling; the consolidation of two license conditions into one license condition with no modification to requirements; the removal of the requirement for an investigation on whether the Ranch House Draw is integrated with the Monument Draw since this was fulfilled in 2011; the removal of the requirement regarding a small playa located on the eastern edge of the Compact Waste Disposal Facility (CWF) since this playa was removed during construction of the Phase 2a expansion of the CWF; the removal of the requirement to install two wells for the

225 foot layer if the thickness of the 225 foot layer at that location is less than 15 feet or is absent; the removal of the requirement to install a 180 foot well if the 125 foot well becomes saturated; that the requirement for the annual and for-cause internal contamination surveys to be whole body counts be changed to bioassay; the change of the due date for the annual dose report from March 31 to April 10; that the requirement that the laboratory conducting the bioassay submit their Quality Assurance (QA) program to the executive director be changed to a requirement that they submit it upon request of the executive director; the removal of the requirement that step-off pads be located outside posted contamination areas and/or high contamination areas if these areas are located outdoors; the modification of "area" to "restricted area" for the requirement that workers be surveyed when exiting an "area" where contact with radioactive material is possible; the change of the due date for the annual REMP report from May 31 to June 30; the use of native red bed clays to replace the concrete layer in the cover and caliche gravel to replace the concrete layer in the floors and sidewalls of the CWF and the Federal Waste Facility (FWF) as materials that are "technologically equivalent or superior" to concrete; the replacement of the prentice arm with a mobile excavator for waste processing; the removal of the requirement that tier 1 and 2 waste containing depleted uranium received under license condition 192 be classified as Tier 3 regardless of the sum of fractions or concentration value; decrease the sampling frequency of 225-foot zone groundwater wells; and by initiative of the Executive Director to update the contact information.

Notice and Opportunity to Comment on Requests for Consistency Agreement/Concurrence Under the Texas Coastal Management Program

On January 10, 1997, the State of Texas received federal approval of the Coastal Management Program (CMP) (62 *Federal Register* pp. 1439 - 1440). Under federal law, federal agency activities and actions affecting the Texas coastal zone must be consistent with the CMP goals and policies identified in 31 TAC Chapter 26. Requests for federal consistency review were deemed administratively complete for the following project(s) during the period of September 23, 2025 to October 10, 2025. As required by federal law, the public is given an opportunity to comment on the consistency of proposed activities in the coastal zone undertaken or authorized by federal agencies. Pursuant to 31 TAC §§30.20(f), 30.30(h), and 30.40(e), the public comment period extends 30 days from the date published on the Texas General Land Office web site. The notice was published on the web site on Friday, October 17, 2025. The public comment period for this project will close at 5:00 p.m. on Sunday, November 16, 2025.

Federal Agency Activities:

Applicant: Texas Department of Transportation

Location: Farm-to-Market (FM) 522 bridge over San Bernard River in Brazoria County, Texas.

Project Description: FM 522 bridge replacement. The proposed project would extend for a total of 0.355 miles along FM 522 at the San Bernard River. Roadway improvements would take place within the existing right of way. The proposed facility would remove and replace the bridge to existing conditions with a new shifted centerline 0 to 18 feet west of its current location. After this shift, the remaining right of way would measure approximately 16.19 feet on the left side and 43.13 feet on the right. The proposed facility would be 50.58 feet wide and span a total length of 631.65 feet.

Type of Application: U.S. Coast Guard bridge permit exemption.

CMP Project No: 25-1012-F2

Federal License and Permit Activities:

Applicant: Abed Besaiso

Location: The project would affect waters of the United States associated with estuarine marine wetlands adjacent to Swan Lake at 212 Beachcomber Avenue, Surfside, Brazoria County, Texas.

Latitude and Longitude: 28.965397, -95.272122

Project Description: To provide a single-family residence on privately owned property in the community of Surfside, Texas. The applicant proposes to discharge 110 cubic yards of fill material into a 5,330-square-foot area (0.12-acre) of estuarine marine wetlands (E2EM) wetlands for the construction of a single-family home. The home components include a 1,200-square-foot home and 360-square-foot deck, supported by timber pilings. Additional components include a 2,080-square-foot driveway and 900-square-foot septic system. For construc-

tion, the soil fill will be placed in the 2,080-square-foot driveway beneath the 1,200-square-foot home and in the 900-square-foot septic system footprint. The driveway will be topped with six inches of crushed concrete. During the piling installation, temporary impacts will occur within the same footprint as the permanent impact area. The pilings that are placed behind the home and deck will be installed using a mechanical pile driving hammer. The fill material will be placed and the septic system installed with a backhoe, or skid steer.

The applicant has provided the following explanation why compensatory mitigation should not be required: The initially desired project would have had an impact of 0.13 acre of impacts to tidal wetlands, but the applicant reduced the square footage of the home such that impacts are near threshold for the Nationwide Permit program, with only 0.12 acre of impacts. Due to the minimized footprint, no compensatory mitigation is proposed.

Type of Application: U.S. Army Corps of Engineers permit application # SWG-2025-00289. This application will be reviewed pursuant Section 404 of the Clean Water Act. Note: The consistency review for this project may be conducted by Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

CMP Project No: 25-1008-F1

Further information on the applications listed above, including a copy of the consistency certifications or consistency determinations for inspection, may be obtained from the Texas General Land Office Public Information Officer at 1700 N. Congress Avenue, Austin, Texas 78701, or via email at pialegal@glo.texas.gov. Comments should be sent to the Texas General Land Office Coastal Management Program Coordinator at the above address or via email at federal.consistency@glo.texas.gov.

The Auctioneer Board recommended approval of the penalty matrix at their meeting held on June 26, 2025. The penalty matrix was presented to the Commission on August 21, 2025, and was adopted as recommended.

enforcement plan also presents the criteria that are considered by the Department's Enforcement staff in determining the amount of a proposed administrative penalty or the magnitude of a proposed sanction. The enforcement plan is revised to include the penalty matrix for the Electric Vehicle Charging Stations program.

The Texas Legislature enacted Senate Bill 1001 and 1002, 88th Legislature, Regular Session (2023), which gave regulatory authority of Electric Vehicle Charging Stations to the Commission and Department.

The Electric Vehicle Charging Stations Workgroup assisted in the creation of the penalty matrix on April 2, 2025. The penalty matrix was presented to the Commission on August 21, 2025, and was adopted as recommended.

A copy of the revised enforcement plan is posted on the Department's website and may be downloaded at www.tdlr.texas.gov.

To claim a "PLATINUM MILLIONS" Scratch Ticket Game prize of \$3,000, \$30,000 or \$1,000,000, the claimant must sign the winning Scratch Ticket and may present it at one of the Texas Lottery's Claim Centers. If the claim is validated by the Texas Lottery, payment will be made to the bearer of the validated winning Scratch Ticket for that prize upon presentation of proper identification. When paying a prize

of \$600 or more, the Texas Lottery shall file the appropriate income reporting form with the Internal Revenue Service (IRS) and shall withhold federal income tax at a rate set by the IRS if required. In the event that the claim is not validated by the Texas Lottery, the claim shall be denied and the claimant shall be notified promptly.

4. delinquent in child support payments in the amount determined by a court or a Title IV-D agency under Chapter 231, Family Code.

E. If a person is indebted or owes delinquent taxes to the State, other than those specified in the preceding paragraph, the winnings of a person shall be withheld until the debt or taxes are paid.

2.4 Allowance for Delay of Payment. The Texas Lottery may delay payment of the prize pending a final determination by the Executive Director, under any of the following circumstances:

- A. if a dispute occurs, or it appears likely that a dispute may occur, regarding the prize;
- B. if there is any question regarding the identity of the claimant;
- C. if there is any question regarding the validity of the Scratch Ticket presented for payment; or
- D. if the claim is subject to any deduction from the payment otherwise due, as described in Section 2.3.D of these Game Procedures. No liability for interest for any delay shall accrue to the benefit of the claimant pending payment of the claim.

2.5 Payment of Prizes to Persons Under 18. Any rights to a prize that is not claimed within that period, and in the manner specified

in these Game Procedures and on the back of each Scratch Ticket, shall be forfeited.

2.8 Disclaimer. The number of prizes in a game is approximate based on the number of Scratch Tickets ordered. The number of actual prizes available in a game may vary based on number of Scratch Tickets manufactured, testing, distribution, sales and number of prizes claimed. A Scratch Ticket Game may continue to be sold even when all the top prizes have been claimed.

Notwithstanding any name or names submitted on a claim form, the Executive Director shall make payment to the player whose signature appears on the back of the Scratch Ticket in the space designated. If more than one name appears on the back of the Scratch Ticket, the Executive Director will require that one of those players whose name appears thereon be designated by such players to receive payment.

Public Utility Commission of Texas

Notice of Application for True-Up of 2022 Federal Universal Service Fund Impacts to the Texas Universal Service Fund

Notice is given to the public of an application filed with the Public Utility Commission of Texas (commission) on September 30, 2025, for true-up of 2022 Federal Universal Service Fund (FUSF) Impacts to the Texas Universal Service Fund (TUSF).

Docket Style and Number: Application of Border to Border Communications, Inc. for True-Up of 2022 Federal Universal Service Fund Impacts to the Texas Universal Service Fund, Docket Number 58771.

The Application: Border to Border Communications filed a true-up in accordance with ordering paragraphs 2, 4, and 5 of the Notice of Approval issued in Docket No. 53972, *Application of Border to Border Communications, Inc. To Recover Funds from the TUSF Under PURA § 56.025 and 16 TAC § 26.406 for Calendar Year 2022*. In that docket, the Commission determined that the Federal Communications Commission's actions were reasonably projected to reduce the amount that Border to Border received in Federal Universal Service Fund (FUSF) revenue by \$1,567,055 for calendar year 2022. It was also estimated that Border to Border would recover \$1,567,055 of the projected FUSF revenue impact from rate increases implemented for the same time period. Border to Border's request to recover \$1,567,055 from the Texas Universal Service Fund (TUSF) for 2022 was approved. Ordering paragraphs 2, 4 and 5 of the Notice of Approval in Docket No. 53972 require Border to Border to file its final and actual FUSF impacts for 2022 by September 1, 2025, with detailed supporting documentation containing the requirements for potential over- or under-recovery from the TUSF. Border to Border states that it did not fully recover the impacted FUSF revenues for 2022. Therefore, Border to Border seeks additional TUSF funds in the amount of \$35,191 in this true-up proceeding.

Persons wishing to intervene or comment on the action sought should contact the Commission by mail at P.O. Box 13326, Austin, Texas 78711-3326, or you may call the PUCT Consumer Protection Division at (512) 936-7120 or toll-free at (888) 782-8477. Hearing and speech-impaired individuals with text telephone (TTY) may contact the commission through Relay Texas at (800) 735-2989. A deadline

for intervention in this proceeding will be established. All comments should reference Docket Number 58771.
