

UNIFORM COMMERCIAL CODE (UCC) BULK ORDER FILE LAYOUTS

(Rev.7/22/2025) Bulk Order Types

The bulk order types listed below will use the format detailed in the following sections:

1. Master Unload (New Master Unload)
2. Daily Filing Update

Bulk Order file generation and file formats

For bulk orders of type 1, a **data** file is generated on a monthly basis. Files are put in a specified directory on the server and are made available to clients upon purchase. For type 2, a file containing **data** and **images** is generated daily at 1:00 AM.

Bulk order data is now provided in JSON format. Each record type will be represented as a JSON object with the associated fields:

- Record Code 1. Master Record
- Record Code 2. Organization Debtor File
- Record Code 3. Individual Debtor File
- Record Code 4. Organization Secured Party File
- Record Code 5. Individual Secured Party File
- Record Code 6. Amendment File
- Record Code 9. Trailer Record

Each record's structure will follow a defined JSON schema specific to the record code.
